

Email 1/11/19

We have been advised that our funding application for £29.4m of Housing Infrastructure Funding (HIF) to provide infrastructure for the future redevelopment of St. George's Barracks has been successful.

We submitted our application, based on the latest Evolving Masterplan for St. George's, in February 2019.

The successful bid now means essential infrastructure works could be brought about in advance of the site's redevelopment – ensuring appropriate and timely investment in infrastructure and local public services, including upgraded roads and junctions, new healthcare facilities and public transport.

As I detailed when I informed you about the Garden Communities Funding last month, although this is great news for Rutland, it is important to emphasise this does not alter the statutory process the St. George's development is subject to and Rutland County Council's Full Council will need to agree to accept the funding offer.

Should you have any questions or queries, please do not hesitate to contact me.

Regards,

Helen Briggs
Chief Executive
